Times Tables Rockstars is the software we use to aid the rapid recall of multiplication facts. It has two different versions: the version that is completed in school is a worksheet-based version. This is completed daily within class. The second version is an online version which can be accessed at home and has many fun game modes to help children learn their times tables. Each child has a rock avatar, and the more they play, the more coins they get that can be spent on accessories for their avatar. It would be great if all parents could encourage their children to use Times Tables Rock Stars at home
