

More Able Explore Learning Mathematicians' Award Competition

Four of our More Able mathematicians were chosen to take part in an Explore Learning Maths Award on 15th January 2020. Moat Farm were competing against five other schools in the community.

For the past 10 years, Explore Learning have been inspiring children to discover the magic of maths with their free competition, run with their friends at the NRIC project at the University of Cambridge. We have had the unique opportunity to tackle a never-before-seen mathematical problem and hopefully get the chance to compete at the Grand Final at The Natural History Museum!
